

### Le CSA autorise le Triple Play Hypercable sur la ville de PARIS dans le spectre 41.5-42.5 GHz

Le projet Digital Life Lab est adossé à l'utilisation de la technologie Hypercable développée et installée par /M/D/S/international.

The screenshot shows the website of the Conseil Supérieur de l'Audiovisuel (CSA) for the French Republic. The page title is 'Décisions' and the main article is 'BluWan : expérimentation autorisée'. The article is dated 28 février 2007 and refers to an assembly held on 22 janvier 2007. The text states that BluWan has been authorized to provide MVDDS services in Paris from February 1, 2007, for a nine-month period. The services include Multi-Channel Video Distribution and Data Service. The authorization is subject to the company respecting technical characteristics defined by the CSA.
